

Pure | PLUS Research

Dr S Lang

What is Pure?

<https://www.elsevier.com/solutions/pure>

- Market leading Research Information Management System
- evidence-based strategy to unlock full research potential
(leading to increased funding, improved international collaboration and greater visibility ... - according to Pure website)
- *“Good research information management practices allow universities to better understand the full picture of activity on campus. [...] When you fully understand all the researcher-related activity on campus, you can make more informed decisions that can help guide your research strategy.”* <https://www.elsevier.com/promo/pure/ref2021>
- Fulfils all dreams of the FODOK times (does it?), but ...
- ... is a commercial solution

PLUS Research

- PLUS Research uses Pure as a PAAS to
 - showcase the scholarly activities, expertise and output of faculty members at PLUS

**PLUS
Research**

**UNIVERSITÄT
SALZBURG**

PLUS Research

- Community (internal, external)
 - The window to the outside world:
“We invite you to learn more about the research activities across all disciplines by exploring researcher profiles or by browsing through our publications and projects”

Collaborations from publications and projects within the past 5 years.

Click dots and donuts to bring up details.

Estimating the spatial distribution of crime events around a football stadium from georeferenced tweets

Ristea, M-A., Kurland, J., Resch, B., Leitner, M. & Langford, C., 2018, 7, 2, 43.

Transition FODOK -> Pure

- Until 2018: University reports (e.g. the “Wissensbilanz”) had to be generated +- manually from the FODOK system
- A series of drawbacks were attached to FODOK (no real interfaces to web-based citation databases, etc.)
- PLUS uses Pure as a CRIS (current research information system) – live update, actual status
- Ideally, Pure is linked to individual researchers’ profiles (e.g. via ORCID).
- But: there is a transition time (2019 ...) 😊

How to access PLUS Research?

- Via University homepage and personal login

PLUS-Login | Bibliothek | eLEARNING | eMAIL | PLUSonline | Uni Blog commUNITY | **PLUS Research**

PLUS Research

- Support: [FIS-Wiki](#)

The screenshot shows the FIS Wiki interface. The top navigation bar is green with the text 'INFORMATION MANAGEMENT' and a search bar labeled 'Suchen'. Below this is a grey bar with 'Informationen', 'Profil', and 'Hilfe' dropdown menus. The left sidebar is light blue and contains the 'FIS Wiki' logo, a star icon, and a list of links: 'Seiten', 'Blog', 'SEITENHIERARCHIE', 'Aktuelles', 'Das Pure-Konto', 'Forschungsleistungen erfassen', and 'Forschungsleistungen darstellen'. The main content area is white and contains the following text:

Bei Pure handelt es sich um eine Online Datenbank zur umfassenden Dokumentation und Verwaltung der Forschungsleistungen der Universität Salzburg.

Welchen Nutzen hat Pure für Forscher?

- Automatische Erstellung eines optisch ansprechenden CV inklusive Publikationsliste, Projekte,...
- Import in Literatur Verwaltungsprogramme wie Endnote, Citavi,...
- Direkter Import aus Schnittstellen wie Scopus, Web of Science und Pubmed
- Öffentliche Zugänglichkeit für Dritte

Dieses Handbuch behandelt die wichtigsten Funktionen, die Sie benötigen, um mit Pure zu arbeiten. Selbsterklärende Schritte werden, der Übersicht halber, nicht besprochen.

Book

Assessing global Sentinel-2 coverage dynamics and data availability for operational Earth observation (EO) applications using the EO-Compass

Sudmanns, M., Tiede, D., Augustin, H. & Lang, S., 1 Jan 2019, In : International Journal of Digital Earth.

Research output: Contribution to journal > Article > Research > peer-review

 Open Access

Big Earth data: disruptive changes in Earth observation data management and analysis?

Sudmanns, M., Tiede, D., Lang, S., Bergstedt, H., Trost, G., Augustin, H., Baraldi, A. & Blaschke, T., 1 Jan 2019, In : International Journal of Digital Earth.

Research output: Contribution to journal > Review article > Research > peer-review

 Open Access

Estimating urban population patterns from stereo-satellite imagery

Steinnocher, K., Bono, A. D., Chatenoux, B., Tiede, D. & Wendt, L., 2019, In : European Journal of Remote Sensing. 0, 0, p. 1-14 14 p.

Research output: Contribution to journal > Article > Research > peer-review
